EXPERIENCE

Front End Engineer / Research Engineer

Lamah

📅 2020 - Ongoing

Lamah is a start-up company located in Libya which focuses on innovation of software, solving problems and providing the best systems in the country.

- Worked with a team of 7 members and provided end-to-end solutions.
- Handled 1 project end to end from concept development to delivery.
- Improved the design process by researching and analyzing the best techniques that other companies use.
- Improved the technical side of work by researching techniques which we could use in our day to day work.

PROJECTS

Restaurant / Café System (React & Redux)

📍 Lamah

🔗 Private Code

Designed and developed the Front End of a Restaurant / Café system using React and Redux which was then used internally in the company.

Digital Currency Wallet (React)

📍 Lamah

🔗 Private Code

Designed and developed the Front End of a Digital Currency Wallet using React which is still under development currently.

Internal Work System / ERP (Under Development)

📍 Lamah

🔗 Private Code

Researching and designing the system by having it broken into sub-systems.

SUMMARY

The moment I produced "Hello World" in the console of my first application, I knew I was hooked onto the world of software development.

I've always been interested in technology as a child and had an intense passion for its dynamics, so I immersed myself into working harder with fervor to develop this passion.

In my spare time, I can be found in the gym, reading the latest tech articles or working on content creation.

SKILLS

Front End

HTML & CSS

JavaScript

Sass
